

Date:10/12/16

Wednesday Challenge Form

Group Members: Jonathan, Shaunt, Rohin

Problem Statement: We needed to make a house
With cards by stacking them up. The highest one
Will win

Approach: At first we tried to make the house
A table because it was very flat. After that didn't
work, we started to make it on the carpet
because it would give the cards on the bottom
more grip.

Solution: In the end we only got up to 3 stories. We didn't
Tell Mr. Neat to measure the house before it fell so
we didn't have a score at all.

Lessons Learned: we learned that we always
keep track of our progress.
